Dominik Czirjak

www.linkedin.com/in/czirjak

Generalist with 1.5+ years at an insurtech unicorn working with leadership, and 1 year in M&A. Worked across BizOps, product and partner management, often taking on work that had no owner: making the calls, finding the right people and seeing it through.

PROFESSIONAL EXPERIENCE

2024 – 2026 **Ominimo Insurance | $1.6B Insurtech startup, McKinsey founders | Budapest, Hungary**
Business Generalist (early-hire)

- Owned initiatives end to end across product, operations, data and commercial – scoping, prioritisation, solution design, coordinating engineers & operations teams, and shipping
- Main point of contact for Signal Iduna, the insurance partner the whole business ran on, from licensing and operations to approving launches
- Ran the relationships with the outsourced call centre and other third-party vendors
- Product manager for claims: shipped in under two months after a six-month stall, then owned further features, often steering the insurance partner toward what was worth building
- Product manager for LLM and AI automation: built & shipped an AI chatbot (later adopted in 3 more markets) and an email automation handling 60% of all inbound emails
- Doubled active contracts by diagnosing and fixing the root cause of a sales-funnel drop-off, then surveyed hundreds of stuck customers to improve conversion further
- Built the online claims journey, then took it further: found only 25% of claims came through it, so convinced Signal Iduna to build a redirect - lifting it to 60% and cutting manual entry
- Spotted that the company had no structured project tracking and introduced a system, later adopted across every country launch
- Led high-risk repricing of thousands of live policies, designing everything the engineers built, the ops team ran, and customers received - 3.6% revenue increase on the product
- Challenged a leadership decision on claims settlements by independently gathering data and modelling the impact - reversed it, and initiated the ML-based framework that replaced it

2022 – 2023 **Consulting Projects, Part-time | London, United Kingdom**

- Project lead - growth strategy for food delivery startup; Consultant - B2C GTM strategy for fashion brand

2021 – 2022 **Invescom Corporate Finance | Budapest, Hungary**
Analyst & Intern, Investment Banking (Mergers & Acquisitions)

- Performed in-depth analyses on 10+ client companies - covering market dynamics, financials, competitive landscape, and strategy - and synthesised findings into deal materials and investment presentations for prospective buyers

EDUCATION

2022 – 2023 **London Business School | London, United Kingdom**
Master's in Management

2018 – 2022 **Corvinus University of Budapest | Budapest, Hungary**
BSc in Economics, Grade: 1st Class | Focus: Statistics & Data Science
Academic Scholarship (top 5% academic performance), Teaching Assistant - Faculty of Statistics

PROJECTS

Job pipeline Scheduled tool that automatically scrapes, filters, enriches and LLM-scores job postings

Voice capture Two dictation-based Gemini API tools: a spreadsheet for health/habit analysis, and brain dumps split into organised lists to come back to later

Movie finder Helps decide what to watch tonight: all streaming services in Hungary, filterable, sortable
